

SHELL PARTNERSHIPS  
IN SYRIA HAVE  
LED TO MANY  
SUCCESSFUL  
EXPLORATIONS.  
AND NOT ALL  
OF THEM ARE  
**IN OIL.**

With oil representing majority of Syria's exports, Shell is undoubtedly one of the largest foreign investors in Syria.

In terms of economic prosperity, Shell has contributed billions of dollars to Syrian economy. Shell has also introduced a host of world-class technologies, including the Virtual Reality Centre, Advanced Water Flood Management, Underbalanced Drilling and Cemented Competition.

Shell has pioneered much of the world's oil and gas technologies in use today and continues to innovate in all its activities. But Shell strongly believes that long-term partnerships cannot be sustained without sustainable development of the country in which it operates.

Shell has widely contributed to the progress of Syria and its people through maximising the employment, wealth-creation, development of nationals and technology transfer benefits of all its projects.

Annual contributions for national staff training, funding HSE training, sponsoring scholarships (Chevening), supporting archaeological excavations and establishing Computer training centres, and a Study Centre are

all part of Shell's vision of partnership built on a solid foundation of mutual trust and respect.

Syria Shell's social investment initiatives include construction of the New Medical Hospital, Water-lifting Stations, Highway Lighting, Waste-trucks and Garbage containers for the upliftment of the Deir Ez Zor province.

For Shell, creating a healthy, prosperous society with the help of its partners continues to a long-term goal of its business.
