

Security Systems

Employing more than 5,000 specialists worldwide, the Group provides to the private and public sectors a range of security systems, including:

- the design, installation, maintenance
- and monitoring of intruder alarms
- access control
- biometrics
- CCTV

Intruder Alarms

We provide an assessment of customer requirements, designing and installing the most effective intruder alarm system - ranging from a single-site system to a fully integrated and networked alarm system covering multiple locations.

Control Room Systems

We provide on-site or remote alarm and access control monitoring via manned control room facilities. These facilities are designed to detect and manage a range of incidents such as unauthorised access, fire or emergency service alert.

Risk Assessments

We also offer consultancy and risk audit services, including surveys of key risk areas for customers and solutions for risk reduction.

Integrated Security

While demand for electronic security systems is growing, in most cases these systems still require the presence, on site or remotely, of guards. We address the customers' demands for a complete security solution by providing flexible combinations of manned and electronic security elements.

In summary the Security Systems we offer include:

- Surveillance
- Home Detention Monitoring Equipment
- GPS Systems
- Alarm Installation
- Systems Management and Maintenance
- Explosives Detection Equipment
- Alarm Monitoring

- Access Control
- Home Alarms
- Satellite Tracking
- CCTV
- Personal Protection
- Consultancy services
- Integration of People and Systems
- Risk Assessment
- Security Survey Services

Blast Mitigation & Safety Products

Group 4 in Syria also supply a full range of blast protection which includes;

- Anti Shatter film for windows
- Catchment systems
- Bullet Resistant Glass
- Gabion Containers
- Dynablok

We also supply **QuickClot** a revolutionary Anti coagulant which prevents death from bleed out, which is the primary cause of death in cases of major trauma
