

ATM FRAUD

See how it was done in Oman

Jim Mann from SABB shares a few thoughts

37 Bank Muscat ATM's in Al-Khuwair, Muscat were detected with scamming devices and reported to the Royal Oman Police by the Bank in April 2008.

Most ATM's are set within the body and are not usually protruding above the base. Card Slots are also usually set within the machine and do not protrude above it.

A few tips to avoid being caught would include using the same ATM frequently since you are far more likely to spot tampering if you are familiar with the machine.

Watch as well for miniature cameras stuck to the ATM slot and always shield your hand movements when entering your PIN Code.
