A Tommy Cooper Classic
 <<<<>>>>
 Apparently, 1 in 5 people in the world are Chinese. And there are 5 people in my family, so it must be one of them. It’s either my mum or my dad. Or my older brother Colin. Or my younger brother Ho-Cha-Chu. But I think it’s Colin.

Three old frenchmen sitting on a park bench in Paris.
The first said, “To come here used to take me five minutes; today it took me half an hour. At eighty-five years old, my legs are letting me down.”
The second replied, “Legs, that’s nothing. I used to read the newspaper without glasses, but today even with glasses I can see nothing. At ninety years old it’s my eyes that are letting me down.”
The third joined in, “Eyes and legs, that’s nothing. When I went home yesterday evening after I left you, I looked at my wife doing the washing up, felt the urge, and said to her, ‘Let’s go and make love.’ She said ‘You’ve already done it once today.’ I tell you at ninety-five years old, my memory’s letting me down!”

New Product Announcement
 Announcing the new Built-in Orderly Organized Knowledge device, otherwise known as the BOOK.
 It’s a revolutionary breakthrough in technology: no wires, no electric circuits, no batteries, nothing to be connected or switched on. It’s so easy to use even a child can operate it. Just lift its cover. Compact and portable, it can be used anywhere—even sitting in an armchair by the fire—yet it is powerful enough to hold as much information as a CD-ROM disk.
 Here’s how it works: each BOOK is constructed of sequentially numbered sheets of paper (recyclable), each capable of holding thousands of bits of information. These pages are locked together with a custom-fit device called a binder which keeps the sheets in their correct sequence. By using both sides of each sheet, manufacturers are able to cut costs in half.
 Each sheet is scanned optically, registering information directly into your brain. A flick of the finger takes you to the next sheet. The BOOK may be taken up at any time and used by merely opening it. The “Browse” feature allows you to move instantly to any sheet, and move forward or backward as you wish. Most come with an “index” feature, which pinpoints the exact location of any selected information for instant retrieval. An optional “BOOKmark” accessory allows you to open the BOOK to the exact place you left it in a previous session—even if the BOOK has been closed. BOOKmarks fit universal design standards; thus a single BOOKmark can be used in BOOKs by various manufacturers.
 Portable, durable and affordable, the BOOK is the entertainment wave of the future, and many new titles are expected soon, due to the surge in popularity of its programming tool, the Portable Erasable-Nib Cryptic Intercommunication Language stylus [PENCIL].
