

The MULTINATIONAL SCHOOL

Since its inception three years ago, the SAIS-R Multinational School has risen to the ranks of being one of the best international schools in Riyadh. Although primarily geared towards the educational needs of students from Australia and New Zealand, the school has attracted pupils from all over the world. It currently plays host to 42 different nationalities.

In a relatively short period of time, the Multinational School has achieved the reputation of outstanding academic performance in conjunction with a policy that allows every child the opportunity to learn. Indeed, the unique philosophy of accepting children from a variety of academic backgrounds has demonstrated the school's commitment to providing a positive and valuable learning experience for all its students. Results of the LAP (Learning Assessment Project) exams, conducted in all schools under the umbrella of the Victorian Ministry of

Education, placed the school on par with the highest achieving schools in Australia. The school has received full accreditation from the Victorian Ministry of Education and will extend its current program to incorporate Years 11 and 12 in September.

The school's desire to encourage all students to thrive in a friendly and supportive environment is enhanced by its Learning Support Program. This allows students, who find it difficult to cope with the demands of the curriculum, to attend mainstream classes whilst receiving individual instruction from a counselor. This program has proven very successful with students who have minor learning disabilities. The school's Special Needs department is more specialised in dealing with problems of a more serious nature and offers Individual Education Programs (IEPs) that are specifically geared to the child's individual needs.

The new premises, located near Exit 7, can accommodate a larger enrollment than ever before and will allow even more students the opportunity to benefit from an education that is second to none.
