

## TRANSFERRING TECHNOLOGY FOR TOMORROW'S EXPERTS

BAE Systems' strategic imperative is to build and support an industrial capability in Saudi Arabia. This involves the transference both of hi-tech aerospace work to indigenous industries and of the expertise to young Saudi engineers and technicians. The result will be the creation of sun-rise industries; industries that stimulate technology development and attract further investment.

Our mission is to bring global thinking to policies geared specifically to partnership with the government, customers and people of Saudi Arabia.

**BAE SYSTEMS**

REAL SUPPORT. REAL ADVANTAGE.
