

SPACEMAKER
ACCOMMODATING YOUR NEEDS

Services Offered

Spacemaker offers traditional timber framed or cold rolled lightweight steel framed buildings to meet any clients most exacting standards.

Spacemaker works with clients on initial designs through to final delivery of the building to ensure absolute satisfaction

traditional

modern

progressive

alternative

Spacemaker is now offering buildings utilising the latest cold rolled forming technology known as **Framemaster**. This computer controlled equipment takes care not just of high quality steel frame production, but also drawings and structural designs.

Typically we are asked to provide:

- High Specification Site Offices
- Permanent Offices
- Site offices that are easy to relocate
- Labour Camps
- Ablution Units
- Corporate entertainment venues
- Villas
- Mosques
- Clinics
- Shops, Banks, etc
- Security huts
